

Old Instructions:

- 1) Log in to WinSCP. Copy input data file (input.txt) from local machine onto Dumbo using WinSCP.
- 2) Make a folder in HDFS called "project" – `hdfs dfs -mkdir project`
- 3) Copy input.txt from Dumbo into HDFS folder named "project" – `hdfs dfs -put input.txt project`

Updated Instructions (Follow these):

- 1) Log in to **WinSCP**
- 2) Copy input data file (**weather_input.txt**) from local machine onto Dumbo using **WinSCP**
- 3) Make a folder in HDFS called **weather**
`hdfs dfs -mkdir weather`
- 4) Copy **weather_input.txt** from Dumbo into HDFS folder named **weather**
`hdfs dfs -put weather_input.txt weather`
